User Input

- User input to a web page can be facilitated through three approaches:
 - `<a>` tags to provide hyperlinks
 - `<button>` tags to create buttons
 - `<form>` to create forms
 - `<input>` to create elements in forms

Buttons

- Simple interaction
 - Clicking of the button
- Button behavior dependent on where it is positioned:
 - Inside a form it takes on specific role
 - General purpose outside
- `<a>` can also be styled using CSS to look like a button

Forms

- Form elements:
 - `<input>`
 - type: text, password, submit, radio, checkbox, button, color, date, datetime, email, month, number, range, search, tel, time, url, week
 - `<textarea>`
 - `<button>`
 - `<select>`
